

# 16 technologies

The Technology Radar has assessed 16 different technologies up until now (April 2022):

- Air Lubrication System (ALS)
- EConverter
- LNG with cold energy recovery
- LPG as fuel
- LPG, ammonia-ready
- Onboard carbon capture and storage (CCS) system
- Compressed hydrogen
- Flettner Rotors
- Renewable methanol
- Solar panels
- Liquefied biogas (LBG)
- LOHC (Liquid Organic Hydrogen Carrier)
- Nuclear power
- OCEAMM
- Regent Seaglidors
- Retractable bow foils

Results of the Technology Radar's assessment for each measure are available for GSP partners.
